Platforms Linux, NGINX, Git, Bitbucket, GitHub, Jira, CI/CD, Buildkite, Microsoft Entra ID, Microsoft Intune

PROFESSIONAL EXPERIENCE

Full Stack Developer | yes

Jul 2024 - Present

Kfar Saba | Hybrid

- Build and maintain production web platforms with Vue.js, Nuxt 3, TypeScript, Pinia, Tailwind CSS, and Bootstrap.
- Modernize legacy tools into modular Vue and Nuxt applications, creating reusable components and responsive interfaces.
- Integrate REST and LLM APIs and work with Java, Kotlin, Cordova, Android, Linux, NGINX, Entra ID, and Intune technologies.
- Manage source control and delivery workflows through Git, Bitbucket, Jira, CI/CD pipelines, and MobaXterm deployments.

Frontend Developer | Telit

Oct 2022 - Jul 2024

Tel Aviv District Israel

- Developed React applications with React Query, Redux, Storybook, Material UI, styled-components, Bootstrap, HTML, and CSS.
- Translated Figma designs and UX requirements into reusable interface components and documented them through Storybook.
- Maintained delivery quality through Git, GitHub, Jira, and peer code review.

Adam Matar

PROFESSIONAL EXPERIENCE

BSS Developer | Telit

Mar 2022 - Oct 2022

Tel Aviv District Israel

- Supported billing and data workflows using Microsoft SQL Server, SQL, SSIS, SSRS, ETL processes, MongoDB, C#, and Python.
- Worked across invoicing, ETL testing, code review, and application usability in an enterprise environment.

Freelance Frontend Developer | Self Employed

Aug 2021 - Jun 2024

- Designed and delivered custom web applications and landing pages using React.js and modern web technologies.

Freelance Graphic Designer | Self Employed

Jan 2015 - Feb 2021

- Created visual and user-experience designs using Adobe Photoshop and Illustrator for freelance clients.

SELECTED PRODUCT

Local Election Management Platform

React.js | PHP | MySQL | Hosted customer deployments

- Initiated and developed the platform end to end with a React frontend, PHP backend, and MySQL database.
- Sold and customized the product for multiple local political parties for use before and during election day.
- Managed hosting and customer-specific configuration from requirements through delivery.
- Worked directly with party representatives and end users to refine workflows through repeated feedback cycles.

EDUCATION

Bachelor of Science in Computer Science

2018 - 2021

The College of Management Academic Studies

Web Stack Developer in Full Stack Development

2017 - 2018

HackerU

Graphic Design Course

2014 - 2015

Tiltan Haifa

CERTIFICATION

Google AI Professional Certificate | Google | July 2026

Coursework in AI application development, data analysis, content creation, research, communication, and Python.
